End to End Surveillance from D-Link

From cameras and switches to wireless access points, network video recorders and software, we have everything you need.

Bringing Business Surveillance Back Into Focus

End to End Surveillance from D-Link

When it comes to end-to-end surveillance solutions, D-Link has you covered. From cameras and switches to wireless access points, network video recorders and software, we have everything you need to customise your business or personal security. And we make it really simple, too. With our exclusive Auto Surveillance VLAN technology, D-Link Smart Switches auto-discover IP cameras, create a virtual LAN and prioritise traffic. Simple.

Dome Cameras

Professional Vandal-proof Surveillance, in up to 4K Ultra High Definition 2, 4 or 8 Megapixel lens and state-of-the-art image enhancement features, packed into a secure and compact form factor that's ready to face the any environment.

Dome Camera Advantages

- It is hard for people to know which way the camera is facing, thanks to its dome shape
- Not easy to vandalize, due to the hardened outer casing (IK10 rated)
- Better coverage of large areas, due to its rotating design

High Quality Videos

Whatever the lighting. Noise reduction, WDR and superior low light performance dramatically improve image quality, even in challenging lighting conditions. The DCS-461x series offer unbelievable flexibility to be manually angled to provide surveillance where you need it the most.

Viewing Angles

(H) 108.6° - 35° - (V) 56° - 21° - (D) 125° - 42°

High Quality Lens

Motorised varifocal 3.3 - 12 mm lens with an F1.4 aperture.

Vandal-proof

The IK10 certified vandal-proof housing makes sure it keeps recording even when intruders attempt to sabotage the camera.

Bullet Cameras

D-Link's Bullet Camera range offer professional, full-featured, high-definition video surveillance that is easy to install and highly affordable. The range consist of cameras designed specifically to meet different surveillance and environmental requirements .

Bullet Camera Advantages

- Perfect for long distance outdoor surveillance (30m night vision)
- Increased visibility of cameras, as usually wall/pole mounted, providing more of a deterrent
- Comparatively easier to install as they can be mounted on any vertical or horizontal surface

Versatile Monitoring in All Environments.

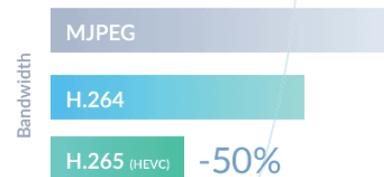

The IP66-rated water and dust-resistant design make this camera ideal for deployment in all weather conditions. The adjustable mount allows the camera to be quickly and easily positioned to get the best field of view.

Weather-resistant

Withstands rain and moisture, with a wide operating temperature range of -30°C to 50°C.

Optimising Bandwidth and Storage

To maximise bandwidth efficiency and improve image quality, the DCS-4718E provides real-time video compression using the H.265, H.264 and MJPEG codecs, supporting three separate profiles for simultaneous video streaming and recording.

NVR Network Video Recorder

All-in-one solution that allows businesses to connect and power up to 16 cameras, and simultaneously record and view real-time video streams from a local network or remotely over the Internet.

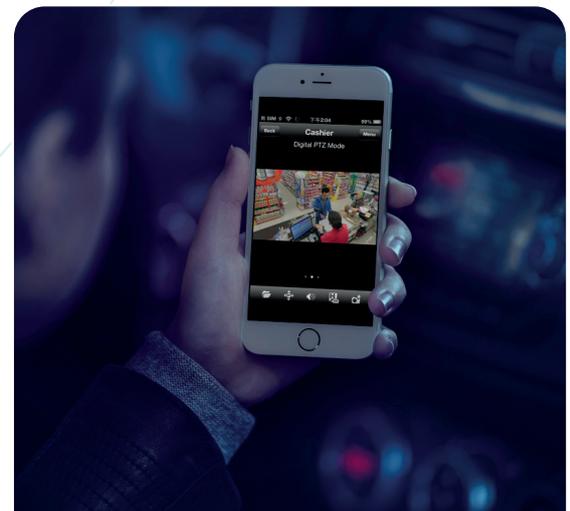

- All-In-One Solution - Standalone NVR solution with no need for additional computer or software
- 16-Channels - Simultaneously record and view real-time video streams from up to 16 cameras
- PoE Capable - 16 x 802.3af PoE ports with a total PoE power budget of 120 W
- High Efficiency Video Coding - Support for the latest H.265 standard to significantly reduce bandwidth and storage requirements
- Dual Bay SATA - Up to 16 TB storage with 2 x SATA 3.5" HDD interface, each supporting up to 8 TB capacity

Free Surveillance Management Software

D-Link Network Cameras include D-Viewcam; a complete surveillance software package to view, manage and record up to 32 cameras on a single computer from a central location.

D-ViewCam Mobile

Keep an eye on your surveillance cameras anytime, anywhere with D-Link's D-ViewCam Mobile app. The D-ViewCam Mobile app makes it easy to check on your home or business no matter where you are, no matter what time of day it is.

Switches for Surveillance

D-Link's range of switches specifically designed and engineered for video surveillance offer both PoE and ONVIF support for the ultimate all-in-one solution

The DGS-1210 Series Gigabit Smart Managed Switches are the world's first PoE switches with ONVIF support specifically designed for Video IP Surveillance applications.

This allows it to recognise ONVIF devices and integrate seamlessly with your surveillance network. With the surveillance-optimised web interface, you can access real-time information on your surveillance network such as surveillance topology and device status, as well as PoE power and network bandwidth utilization. Auto Surveillance VLAN (ASV) function ensures the quality of real-time video for monitoring and control without compromising the transmission of conventional network data.

The DGS-1210 Series switches include support for IEEE 802.3af/at and higher power budgets, allowing more PoE devices to be powered by the switch and for devices to be installed in remote locations without immediate access to power outlets. They offer high PoE power budgets – up to 370W – suitable for powering multiple network cameras.

The DSS-100E Series Fast Ethernet PoE Unmanaged Surveillance Switches are specifically designed for surveillance deployment with high PoE power budgets as well as up to 250 metres long-range PoE support*. This allows cameras to be deployed at an extended distance without the need for additional equipment, providing additional flexibility and convenience as well as saving cost.
